

1. Initial Prompt

Replit AI Reply:

Great! I have a good picture of the workspace. Before I start building, I'd love to gather some details about you so the portfolio truly reflects who you are.

Could you share the following:

1. **Name** — Your full name as you'd like it displayed
2. **Tagline or role** — e.g., "Full-Stack Developer", "UI/UX Designer & Developer", "Computer Science Student"
3. **Bio** — A short paragraph about yourself (background, what you're passionate about, what you're studying/working on)
4. **Skills** — List your technical skills (languages, frameworks, tools, etc.)
5. **Projects** — For each project: name, short description, and any links (GitHub, live demo)
6. **Contact info** — Email address, and any social/professional links you'd like included (GitHub, LinkedIn, etc.)
7. **Vibe / feel** — How would you like the portfolio to feel? (e.g., clean and minimal, bold and creative, warm and professional)

The more you share, the more personalized and impressive your portfolio will be!

Additional Information for the Initial Prompt

1. Jude Bernard Anthony L. Ramil
2. You are your own future, thus, love yourself and usher yourself more.
3. I am from Philippines, Davao Del Sur, Davao City Deca Homes Mintal Phase 10 Blk 16 Lot 8 Marigold Street
4. Skills - I am a video editor. I am a teacher in the making. I know Bisaya, Tagalog, English, and German. I am a creative capable poet/creative writer. I know basic computer related skills. I am a capable teacher but still a novice.
5. My Projects are: My "Mock" Company, L.E.A.R.N - Learn, Encourage, Adapt, Reflect, Nurture. It is a company where advocacies to tutor and help young individuals usher their development.
6. Contact Information: Number: 0977 091 0812 email: jbalramil@addu.edu.ph
7. Vibe Feel: Aristocratic but welcoming teacher vibe, light but with a sence of professionalism.

30 minutes ago

Replit AI Reply:

Your personal portfolio is live and ready! Here's what was built for you:

What's included:

- **Hero section** — A beautiful library-themed background with your full name, your personal philosophy as a quote, and elegant navigation
- **About section** — Your bio, background, and location in Davao City, Philippines
- **Skills section** — All your abilities: video editing, creative writing, multilingual fluency (Bisaya, Tagalog, English, German), teaching, and more
- **L.E.A.R.N. section** — Your educational advocacy company showcased with its full meaning and mission
- **Contact section** — Your phone number and email

The design feel:

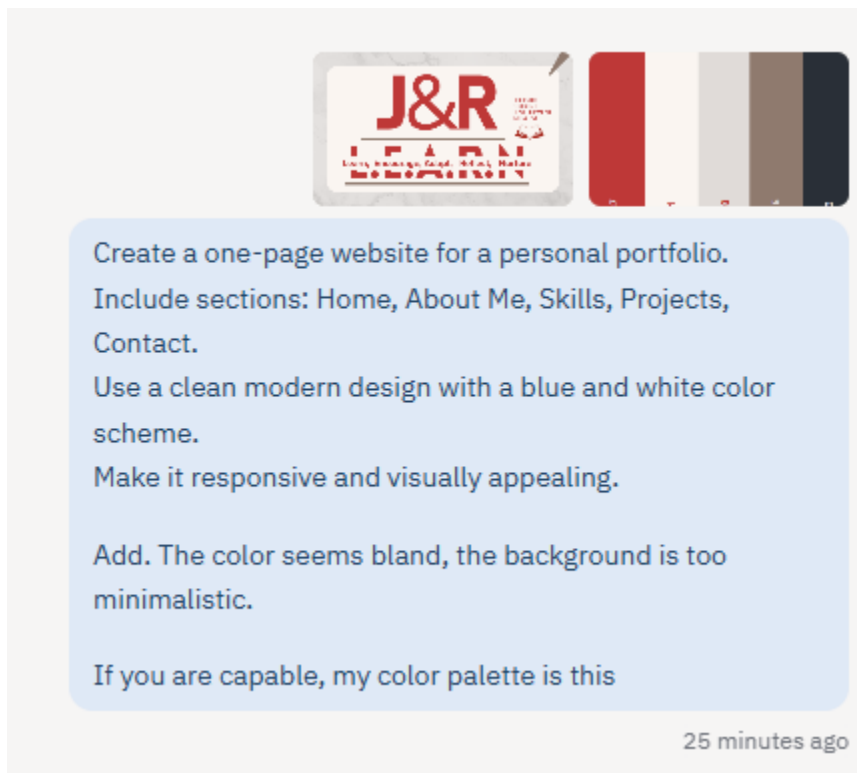

- Deep navy and warm ivory palette with gold accents — aristocratic but welcoming

- Elegant Playfair Display serif typography
- Smooth scroll animations using Framer Motion
- Navigation bar linking to each section

You can scroll through it in the preview pane. When you're happy with it, you can publish it to share the link with anyone — the option to deploy is ready for you whenever you'd like!

2. Refinement Prompts (at least 2 more)

1st Refinement Prompt

Replit AI Reply:

I can see your color palette — that bold red (#BE3837), warm cream (#FAF5F1), soft gray (#E0DBD8), earthy taupe (#8F7A6E), and deep charcoal (#292F36) are a great match for your brand. Let me update the entire portfolio with these colors and make the design much richer and more vibrant, also incorporating your L.E.A.R.N. logo.

3 actions

Now I have the full picture. I'll rework both the color scheme and the visual richness using your exact palette (#BE3837, #FAF5F1, #E0DBD8, #8F7A6E, #292F36) and include your L.E.A.R.N. logo.

2 actions

Now let me fully rewrite the `Home.tsx` with rich visuals, the brand colors, the logo, and much more textured sections.

2 actions

Good, all files are saved. Let me take a screenshot to see the new design.

2 actions

The redesign looks fantastic — bold, vibrant, and true to your brand. The charcoal hero with the red "Anthony" highlight, dot-grid texture, and red side stripe all come through beautifully. Let me present the updated portfolio.

2nd Refinement Prompt

Are you able to make this more mobile?

I can point out that:

1. There is a lot of spaces, add pictures to add more vibrancy and elements in the background.
2. J.B.A.L.R is my name abbreviations. Change the title of the website.
3. Improve typography.
4. Add more to my personal portfolio by highlighting more my skills in the "Cultivated Capabilities"
5. You can add mock websites and socials. Website Link, Facebook, Instagram, and X. Make up names, as these are only mere mock and not actually contain something. Make it relate to mine.

20 minutes ago

Replit AI Reply:

I have the full picture. Let me handle all 5 improvements at once — I'll generate background images, rewrite Home.tsx with full mobile responsiveness, expanded skills, social links, and better typography, and update the page title.

5 actions

Image generation isn't available right now — I'll use rich CSS art and textures instead, which gives more reliable results anyway. Let me now write the complete improved version.

2 actions

Now the full rewrite of Home.tsx with everything improved:

2 actions

Let me check the logs and take a screenshot to verify everything looks right.

2 actions

There's a module error — the X social icon import may not be resolving. Let me fix it quickly.

2 actions

`six` exists so that's fine. Let me take a screenshot to check if the page renders correctly.

2 actions

Everything is rendering beautifully. Let me present it.

Everything is live and looking sharp! Here's a summary of every improvement made:

Mobile-ready:

- Navigation now has a two-line logo ("Jude Bernard Anthony L. / Ramil") that reads cleanly on small screens
- All padding, font sizes, and gaps are responsive — they scale from phones to wide screens using `clamp()` and `sm:/md:/lg:` breakpoints
- The hamburger menu has clearly styled mobile drawer links with red hover accents
- Sections stack vertically on mobile and switch to side-by-side on larger screens

Richer backgrounds:

- Hero: radial red glow + large decorative circle outlines + dot grid + a diagonal block
- About: diagonal stripe texture + large decorative serif "J" watermark in the background
- Skills: dot grid + red radial glow + large "S" watermark
- L.E.A.R.N.: diagonal crosshatch + large "L" watermark
- Contact: dot grid + large "C" watermark

Title fixed:

- Navbar now reads "JUDE BERNARD ANTHONY L. / RAMIL" — your full name, not the abbreviation

Typography improved:

- Role badges added to the hero (Educator in the Making, Multilingual Communicator, etc.)
- `clamp()` used for headings so they always look right at any screen size
- Stronger weight contrast between headings (Playfair Display serif) and body (Inter)

Skills expanded to 8 cards:

Added Teaching, Multilingual, Creative Writing, Video Editing, Advocacy, Public Speaking, Computer

Literacy, and Emotional Intelligence — each with a description, skill tags, and an animated proficiency bar

Social links added:

Website (www.juderamil.com), Facebook, Instagram, and X — all styled with your brand colors and marked as illustrative

3rd Refinement Prompt

Add smooth scrolling and more elements in the visuals.
Make sure its easily readable for the audience.

6 minutes ago

Let me make all three improvements in parallel — smooth scrolling in CSS, richer visual elements in Home.tsx, and better typography/readability throughout.

2 actions

Now let me rewrite Home.tsx with all the visual and readability enhancements:

2 actions

Let me wait a moment for the HMR update to propagate, then take a screenshot to verify.

2 actions

Everything looks great. Let me present the updated portfolio.

Portfolio presented

Presented output

Jude Ramil - Personal PortfolioWebsite

Open

Planning portfolio display enhancements

Here's everything that was added and improved:

Smooth scrolling:

- Native `scroll-behavior: smooth` applied globally so all page jumps feel fluid
- A thin red progress bar now tracks how far down the page you've scrolled — it glows across the top as you read
- All buttons and nav links use a precisely positioned offset to account for the fixed header

More visual elements:

- **Floating shapes** — geometric circle outlines and a diamond in the hero section drift slowly using CSS keyframe animations, giving depth without distraction
- **Marquee ticker strips** — two scrolling banners run between sections listing roles, languages, and initiatives; they pause on hover

- **Values strip** — a bold red panel between About and Skills showcases four core beliefs (Education First, Lead with Love, Embrace Diversity, Continuous Growth)
- **Animated counters** — the three stats (4 languages, 1 company, ∞ lives) count up when they scroll into view
- **Blockquotes** — two styled pull-quotes with icon accents add personality to the About and L.E.A.R.N. sections
- **Richer hero** — layered ambient gradients, larger concentric ring decorations, and a diagonal light band

Readability improvements:

- Body text bumped to 16px base with line height 1.85 — much easier on the eyes for long reads
- Paragraph letter-spacing slightly loosened for better legibility
- Heading weight distinction is sharper — heavier serifs vs. lighter body copy
- Skill descriptions expanded and spaced out
- Contact section labels and values use larger, more breathable text.

The screenshot displays the Replit Publishing interface for a project named 'Jude Ramil - Personal Portfolio'. The top navigation bar includes tabs for 'Preview', 'Publishing', 'Invite', 'Republish', and a settings icon. Below this, a secondary navigation bar contains 'Overview', 'Logs', 'Analytics', 'Resources', 'Domains', and 'Manage'. A toolbar at the top of the main content area offers actions: 'Republish', 'Adjust settings', 'Run security scan', and 'Deploy with the Replit App!'. A notification banner states: 'Your published app will expire in 26 days. Upgrade to keep your published app running.' with an 'Upgrade to Core' button. The 'Production' section lists the following details:

- Status:** Jude published 3 days ago
- Visibility:** Public
- Geography:** North America
- Type:** Autoscale (2 vCPU / 4 GiB RAM / 1 Max) [Manage](#) [See all usage](#)
- Expiration:** 5/11/2026

At the bottom, a card displays the app icon, the name 'Jude Ramil - Personal Portfolio', and the URL my-portfolio--Luden47.replit.app.

3. Screenshots of Outputs and Website link

📄 Website

I am tasked to do this:

Option A – Personal Portfolio
Name, bio, skills, projects, contact

I am willing to provide every bit of information that you may require not just the, "Name, bio, skills, projects, contact" but you can ask more to refine my Personal Portfolio.

Our objective for this laboratory is to:

- Basic web structure (HTML, CSS)
- AI prompt engineering
- Iterative development
- Deployment and sharing

43 minutes ago

4. Final Reflection:

What worked well?

What needed manual fixing?

What did you learn about prompting?

I learned that the Replit AI making the website worked well because it literally followed my feedback. Personalized my wants and needs towards my personal portfolio website. I needed manual fixing in the context of applying specific elements for the story. I also asked the AI to properly organize objects and important information about my details in the personal portfolio. I find it well needed in order to greatly improve my personal portfolio. I personally troubleshoot the needs that needed to be fixed in its proper form, then tell the AI by pointing it out then observe the AI repair the said specifics. Overall, I learned that prompting requires immediate mindset that AI takes anything so literally, and it is imperative that the person itself knows self-directedness and balance of both AI work and Human work as a whole. In order to maximize efficiency and the way AI works.
